DAILY LESSON PLAN

Lesson Title	Common Tools & Equipment Used in Food Preparation and Service Industry
Learning Area/s	TLE-FCS
Name of Student Teacher/s	John Rex B. Duran
Name of Cooperating Teacher	Ferdinand S. Baltazar
Grade Level and Section	Grade 7 - Jeremiah, Kings, and Leviticus
No. of Sessions	1
References *Books, websites, toolkits, etc.*	DepEd's TLE: AFA / FCS / IA Grade 7 Three-Term Budget of Work for Learning Competencies
Declaration of AI use *Cite how AI was used in the formulation of the lesson plan. See DO3. 2. 2026 Annex A*	This lesson plan was developed using AI and subsequently reviewed for accuracy and alignment with curriculum standards.

Intentions

Meaningful learning experiences are anchored in how we frame them. Start by deciding what you want learners to master by the end of the lesson – keep it clear and simple.
Remember: Understanding your learner's evolving context and designing around it ensure that your lessons connect with and are relevant to them.

Learning Competency and Curriculum Standards: *Write the competency/ies from the curriculum that we are targeting, and the content or performance standards applicable to the sessions*	**Learning Competency:** • Identify the common tools and equipment used in food preparation and service industry. **Content Standards:** The learners should have knowledge and understanding of: • Demonstrate an understanding of the fundamentals of the hospitality and tourism industry. **Performance Standards:** By the end of the term, the learners are able to: • The learners apply skills in food preparation and services following safety precautions.

Learning Objectives: *Write the smaller knowledge, skills, or tasks from the competency that the learners will work on and be able to show by the end of the sessions.*	• Identify and define the four major computer number systems. • Differentiate the number systems based on their bases, allowable digits, and practical use in computing. • Appreciate the importance of accuracy and precision when working with computer number systems to avoid technical errors.
Learner Context: *Write your observations of your learners, and how they have been performing or responding to learning experiences recently. Include strengths, interests, and possible barriers to learning.*	

Learning Experience

Learning experience is like a thoughtfully designed journey. Each activity and intersection builds towards meaningful understanding and growth. Identify activities and interactions to help learners gain knowledge, skills, or understanding in a purposeful and coherent way.

	TEACHER'S ACTIVITY	STUDENT'S ACTIVITY

Pre-Lesson: *Describe how you will help the learner get ready for the lesson.*	"Good morning, class! Before we begin, may I request everyone to please stand for our opening prayer."	Students stand and participate in the opening prayer.
	“Thank you. Before you take your seats, pick up the trash under your chairs."	Students pick up the trash and take their seats.
	“Let us check your attendance. When I call your name, kindly say 'Present.'"	Learners respond, "Present!" when their names are called.
	"Before we start, let us remember our classroom rules. First, raise your hand before speaking. Second, listen when someone is speaking. Third, respect everyone. Fourth, participate and always do your best."	Learners listen attentively and acknowledge the classroom rules.
	"I also have a signal. When I say 'Hep Hep!', what should you respond?"	"Hooray!"
	Very good! Let's try it. Hep Hep!"	"Hooray!"
	"To begin our lesson, we will have a short game called 'Name That Kitchen Tool!' Are you ready?"	"Yes, teacher!"
	"I will present five sets of jumbled letters. Your task is to rearrange the letters to form the correct name of a kitchen tool."	Learners listen to the instructions.
	"Raise your hand if you know the answer. Only answer when you are called. Is that clear?"	"Yes, teacher!"
	The teacher presents the following jumbled letters one at a time: NOOPS, FKINE, KSIWH, LWOB, RETAG.	Learners study the letters and try to identify the correct kitchen tools.
	"Excellent! You were able to identify all five kitchen tools!"	Learners participate and celebrate their answers.

	"Based on the game we played, what do you think will be our lesson today?"	"Kitchen tools and equipment, teacher!"
	"Correct! Today, we will discuss the common tools and equipment used in food preparation and service industry."	Learners listen attentively.
Lesson Flow: *Describe the activities that you can implement in 1 or more session to meet your intentions.* Apply the Learning Design Principles, use the prompts below as a guide. Note, not all principles are expected in every lesson. • *Make the objectives clear for the learners* • *Guide learners before letting them try the task on their own* • *Check the state of the learners' well-being, understanding, and mastery over the lesson* • *Connect today's new concepts to past competencies* • *Encourage collaboration among learners* • *Invite learners to reflect on why this matter to them* • *Ensure inclusion for learners' varied abilities, learning styles, and contexts*	"Our lesson for today is entitled 'Common Tools and Equipment Used in Food Preparation and Service Industry.'"	Learners read the lesson title presented on the screen.
	"Before we begin, let us first read our learning objectives. At the end of the lesson, you should be able to:"	Learners listen and read the objectives.
	"First, identify common tools and equipment used in food preparation and service."	Learners listen.
	"Second, classify common kitchen tools and equipment according to their functions."	Learners listen.
	"Lastly, demonstrate appreciation of the importance of proper handling and care of kitchen tools and equipment."	Learners listen and acknowledge the objectives.
	"Before discussing the different kitchen tools, let us first understand what a kitchen is."	Learners listen.
	"A kitchen is a place where food is prepared, cooked, and sometimes stored."	Learners listen to the explanation.
	"Now, let me ask you: What is the difference between kitchen tools and kitchen equipment?"	Learners raise their hands and share their answers.
	"Very good! Kitchen tools are handheld devices or implements	Learners listen.

	used to perform a particular function."	
	"Examples of kitchen tools include spoons, knives, and whisks."	Learners identify the examples shown on the screen.
	"On the other hand, kitchen equipment refers to larger items that handle the bulk of preparation and cooking processes."	Learners listen.
	"Examples include ovens, stoves, and refrigerators."	Learners observe the examples presented.
	"To make it easier to remember, kitchen tools are generally handheld, while kitchen equipment consists of larger items used in food preparation and cooking."	Learners listen and take notes.
	"Now that we know the difference between kitchen tools and equipment, let us discuss the materials used in making them."	Learners listen.
	"There are seven materials presented in our lesson: Aluminum, Stainless Steel, Glass, Cast Iron, Ceramic and Heat-Proof Glass, Teflon, and Plastic and Hard Rubber."	Learners read the materials displayed on the screen.
	"First, Aluminum. It is lightweight, distributes heat evenly, and is inexpensive. However, it is a soft metal, prone to dents and scratches, and requires great care."	Learners listen and take notes.
	"Second, Stainless Steel. It is popular because it is easier to clean, lasts longer than aluminum, and provides even heat	Learners listen and take notes.

	distribution. Its disadvantage is that it is expensive."	
	"Third, Glass. It is good for baking. However, it needs extensive care to ensure a long life and is impractical for surface cooking."	Learners listen and take notes.
	"Fourth, Cast Iron. It is sturdy and durable. However, it must be kept well-oiled to avoid rusting."	Learners listen and take notes.
	"Fifth, Ceramic and Heat-Proof Glass. These are especially used for baking dishes and conduct heat slowly and evenly. However, they must be handled with care."	Learners listen and take notes.
	"Sixth, Teflon. It is a special coating applied inside aluminum or steel pots to prevent food from sticking. However, sharp objects should be avoided to prevent possible scratching."	Learners listen and take notes.
	"Lastly, Plastic and Hard Rubber. These are durable and inexpensive. They are also less dulling to knives and more sanitary than wood."	Learners raise their hands and share their ideas.
	"Class, why do you think it is important to know the materials used in kitchen utensils and equipment?"	Learners listen.
	"Correct! Knowing the materials helps us understand how to properly use, clean, and care for our kitchen utensils and equipment."	Learners focus on the presentation.
	"Now, let us proceed to the different categories of common kitchen tools and equipment."	Learners read the categories displayed on the screen.
	"There are six categories presented in our lesson:	

	Measuring Tools, Cutting Tools, Mixing Tools, Cooking Tools, Kitchen Equipment, and Auxiliary Equipment."	
	"First, Measuring Tools. These are used to measure ingredients accurately."	Learners listen and identify the category.
	"Second, Cutting Tools. These are used to cut, slice, chop, or grate ingredients. Can you give an example?"	"Knife and grater, teacher!"
	"Very good! Third, Mixing Tools. These are used to combine or mix ingredients. What examples did we identify during our game?"	"Whisk, spoon, and bowl, teacher!"
	"Correct! Fourth, Cooking Tools. These are used in handling food during cooking."	Learners listen.
	"Fifth, Kitchen Equipment. These are larger items used for food preparation and cooking, such as ovens and stoves."	Learners listen.
	"Lastly, Auxiliary Equipment. These are additional items that support kitchen operations."	Learners listen.
	"Remember, each category has a specific function. Choosing the appropriate tool or equipment helps make food preparation easier and more organized."	Learners listen and take notes.
	"Let us have a question. Why is it important to choose and use the proper kitchen tools and equipment when preparing food?"	Learners raise their hands and share their answers.
	"Very good! Using the appropriate tools and equipment helps us perform tasks properly, makes	Learners listen.

	food preparation more efficient, and promotes safety." "Why should we also take good care of our kitchen tools and equipment?" "Correct! Proper handling and care help prevent damage, maintain cleanliness, and promote safety while working in the kitchen." "Always remember that every kitchen tool and equipment has its own purpose. We should know how to identify, classify, use, and take care of them properly."	Learners share their answers. Learners listen and reflect on the importance of proper handling. Learners listen and acknowledge the key points of the lesson.
Learning Resources: *List down the learning resources that will help you reach your objectives. Ensure that they are available and inclusive.* *Include options and alternatives in case of emergencies.*	• Canva Presentation • Laptop • Smart TV • Pictures or Visual Examples of Kitchen Tools and Equipment	
Opportunities for Integration and Contextualization: *Write down any possibilities to meaningfully connect to another learning area, special topic, local context, or technology. Write N/A if none.*		

Assessing Learning

Assessments reveal what learners have gained and what they still need help with. These are helpful in providing you with information to guide your future instruction throughout the entire session.

	TEACHER'S ACTIVITY	STUDENT'S ACTIVITY
Formative Assessment: *Create a task, activity or questions to assess learning and provide feedback every now and then. Include ways for learners to ask*	Kitchen Tools and Equipment Quiz 1. Which of the following is considered a kitchen tool? A. Oven B. Stove	

for guidance or support throughout each session. *Remember to provide appropriate accommodation so all learners can demonstrate their understanding (e.g. varied response formats, small group options, visual or auditory supports).*	C. Spoon D. Refrigerator 2. Which kitchen material is popular because it is easier to clean and lasts longer than aluminum? A. Plastic B. Stainless steel C. Cast iron D. Glass 3. What is the main purpose of Teflon coating on cookware? A. To prevent food from sticking B. To make cookware transparent C. To make cookware heavier D. To prevent cookware from heating 4. Which kitchen tool is commonly used for cutting food? A. Measuring cup B. Whisk C. Mixing bowl D. Knife 5. Why should kitchen tools and equipment be handled properly? A. To make them look expensive B. To make food preparation slower C. To promote safety and prevent damage D. To avoid using them regularly **Answer Key:** 1. C. Spoon 2. B. Stainless steel 3. A. To prevent food from sticking 4. D. Knife 5. C. To promote safety and prevent damage	

Ways Forward

Meaningful learning can also happen beyond the classroom – for both the learners and the teacher. Pause and reflect on what happened today.

	TEACHER'S ACTIVITY	STUDENT'S ACTIVITY
Extended Learning Opportunities: *Suggest other learning experiences outside the classroom/class hours that learners may want to access to reinforce what they have learned, to spark their curiosities further, or that may provide them support in their areas of difficulty.*	Encourage learners to observe the kitchen tools and equipment available at home. Ask them to list at least five items and write their corresponding uses.	Observe and identify five kitchen tools or equipment at home. List their names and uses in their notebook.
Reflections: *Think about what you need to change for the next session based on what happened today. Is there something the learners are interested in exploring?* *Are there some things you would like to share with your co-teachers, parents, or school leaders about your classroom experience? What would you like your instructional coach to help you with?* *Reflections may be written in brief notes, bullets, or annotations.*
