Task Sheet No. 2:
ANNOTATED DAILY LESSON LOG

INSTRUCTION:

Obtain a copy of the Daily Lesson Log (DLL) created by your Cooperating Teacher (CT) for the week's teaching period. Using the DepEd issued Budget of Work (BOW) or Most Essential Learning Competencies (MELC), whichever is applicable, as your reference, analyze and annotate the DLL to determine how the planned lesson aligns with the prescribed competencies, learning outcomes, content, activities, assessment, and time allotment.

Procedures:

1. Request a copy of the Cooperating Teacher's DLL. Take note, you are going to annotate the said copy, and you are not allowed to modify the original content of the DLL.
2. Review the Budget of Work (BOW) or the Most Essential Learning Competencies (MELC). Highlight the competency/topic covered by the DLL.
3. Examine the different components of the DLL, based on the topics discussed in this Module 2.
4. Add brief annotations (handwritten) to the copy of the Cooperating Teacher's DLL. Your annotations should explain your observations about the DLL and its alignment with the Budget of Work (BoW) or Most Essential Learning Competencies (MELCs).
5. Use the guide questions below to help you with your annotations.

Guide Questions:

a. Are the learning competencies, content standards, and performance standards based on the official budget of work or MELCS?

b. Are the activities/strategies and assessment aligned with the objectives for the day?

c. What are the resources, activities, and assessment used by your cooperating teacher to ensure that at the end of session, the students were able to meet the expected performance standards?

d. What are the interventions used by the cooperating teacher to ensure inclusivity was achieved?

Note: The submitted output should be supported by the Bow or MELCs as your attachment.

RUBRIC FOR GRADING:

CRITERIA	EXCELLENT	PROFICIENT	DEVELOPING	BEGINNING
Quality of Annotations 50%	Annotations are specific, insightful, evidence-based, and clearly explain instructional decisions and observations.	Annotations are clear and relevant but lack depth in some areas.	Annotations are general and provide limited analysis.	Annotations are minimal, unclear, or absent.
Analysis of Teaching-Learning Components 20%	Critically analyzes objectives, strategies, resources, activities, assessment, and learner engagement with appropriate justification.	Adequately analyzes most components with reasonable justification.	Provides basic analysis of some components with limited justification.	Provides little meaningful analysis.
Completeness, Organization, and Presentation 20%	The annotations and reflection are complete, well-organized, readable, and professionally presented.	Requirements are complete with minor organizational or presentation issues.	Some requirements are incomplete or presentation needs improvement.	Several requirements are missing or poorly organized.
Timeliness of Submission 10%	Submitted on or before the deadline.	Submitted within 1 day after the deadline.	Submitted 2–3 days after the deadline.	Submitted more than 3 days after the deadline.

FIRST TRIMESTER DAILY LESSON LOG
S.Y 2026- 2027

Name of Lesson	Flowcharts, Pseudocode, and Java Operators
Learning Areas	**TECHPRO JAVA PROGRAMMING**
Designed by Teacher/s	FRINCESS R. CENIZAL
Designed for which Grade level and section	Grade 12 – BANATAO/RAVELO (TECHPRO-ICT)
No. Sessions	5 (Week 2- September 21-25, 2026 | Mon-Fri | 5:30 AM- 9:50 AM)
References	DepEd Strengthened SHS Curriculum Guide, TECHPRO BROADBAND INSTALLATION Learning Materials Grade 12, DO 12 s. 2026 Full Implementation of Strengthened SHS Curriculum
Declaration of AI use	This lesson plan was developed using AI and subsequently reviewed for accuracy and alignment with curriculum standards.

INTENTIONS Meaningful learning experiences are anchored on how we frame them. Start by deciding what your learners to master by the end of the lesson– keep it clear and simple. Remember: understanding your learners' evolving contexts and designing around it help ensure that your lessons connect with and are relevent to them

→ These competencies directly align with the prescribed G12 Java Budget of work for weeks 2 and 3.

Learning Competency *What competency/ies from the curriculum are we targeting?*		Convert a simple step-by-step solution or algorithm into a flowchart using basic flowchart symbols.	Design a flowchart for a simple programming problem showing the logical flow from start to end.	Translate a simple algorithm into clear, logical pseudocode and revise pseudocode with missing or incorrect steps.	Apply arithmetic, relational, and logical operators in writing a Java program to calculate expenses and determine budget status.	Apply relational and logical operators in a Java program to determine eligibility for benefits based on salary conditions.
		MONDAY	**TUESDAY**	**WEDNESDAY**	**THURSDAY**	**FRIDAY**
Learning Objectives *What smaller knowledge, skills, or tasks from the competency will learners work on, and what should they be able to show by the end of a session?*	**Learning Domains**	**Learning Session 1**	**Learning Session 2**	**Learning Session 3**	**Learning Session 4**	**Learning Session 5**
	Cognitive	1. Explain the purpose and basic symbols of a flowchart. 2. Convert a simple step-by-step solution into a correctly	1. Explain how decisions are represented in a flowchart. 2. Design a flowchart for a basic programming problem such as displaying the larger	1. Explain the purpose and structure of pseudocode. 2. Translate a simple algorithm into clear pseudocode using proper	1. Identify arithmetic, relational, and logical operators in Java. 2. Apply operators to calculate expenses,	1. Explain the purpose of relational and logical operators in Java. 2. Apply relational and logical operators to

↳ The daily objectives are thoughtfully divided into cognitive, psychomotor, and affective domains to ensure complete student development.

Scanned with CamScanner

What content or performance standards are applicable to the session?					averages, allowances, and deductions. 3. Use relational and logical operators to determine budget status and benefit eligibility.	
	Psychomotor	1. Arrange given algorithm steps in logical order. 2. Draw a flowchart using Start/End, Process, Decision, and Flow Line symbols.	1. Create a complete flowchart for comparing two numbers. 2. Present and explain the logical flow from Start to End.	1. Write pseudocode for displaying the sum of two numbers. 2. Identify missing/incorrect steps and revise a given pseudocode.	1. Write and test a simple Java program using arithmetic operators. 2. Apply relational and logical operators in conditional checks.	1. Develop a Java program that assigns salary values and computes allowances or deductions. 2. Use relational and logical operators to test benefit eligibility and display an appropriate result.
	Affective	1. Demonstrate patience and accuracy when translating steps into symbols. 2. Value logical sequencing in problem solving.	1. Demonstrate confidence in explaining decisions and logical flow. 2. Cooperate with peers in checking flowcharts.	1. Demonstrate persistence in correcting pseudocode. 2. Appreciate clarity and completeness before coding.	1. Demonstrate accuracy and responsibility in writing Java expressions. 2. Appreciate the role of operators in solving practical problems.	1. Demonstrate accuracy and responsibility when applying conditions in a Java program. 2. Show persistence in testing, debugging, and improving program logic.
Learning Resources *What learning resources will be helpful in reaching our objectives?* *What materials are available and inclusive?* *What modalities are accessible to everyone?* *In case of emergency, what alternative resources may be used?*		• Laptop/Desktop Computer • Projector • Java IDE / Java compiler • Flowchart symbols reference • Printed algorithm and pseudocode activity sheets • Sample programming • Java Programming PowerPoint • Calculator or spreadsheet (if available)	• Laptop/Desktop Computer • Projector • Java IDE / Java compiler • Flowchart symbols reference • Printed algorithm and pseudocode activity sheets • Sample programming • Java Programming PowerPoint • Calculator or spreadsheet (if available)	• Laptop/Desktop Computer • Projector • Java IDE / Java compiler • Flowchart symbols reference • Printed algorithm and pseudocode activity sheets • Sample programming • Java Programming PowerPoint • Calculator or spreadsheet (if available)	• Laptop/Desktop Computer • Projector • Java IDE / Java compiler • Flowchart symbols reference • Printed algorithm and pseudocode activity sheets • Sample programming • Java Programming PowerPoint • Calculator or spreadsheet (if available)	• Laptop/Desktop Computer • Projector • Java IDE / Java compiler • Flowchart symbols reference • Printed algorithm and pseudocode activity sheets • Sample programming • Java Programming PowerPoint • Calculator or spreadsheet (if available)
Self- Check *Here are some reminders as I plan my lesson. Was I able to do the following?*		☐ Provide printed and digital versions of activities ☐ Follow manufacturer/installer safety procedures (wear protective eyewear, handle glass shards safely ☐ Do not look directly into fiber connectors or active optical ports			☐ Keep fiber ends capped when not in use. ☐ Use simulated components or step-by-step videos when live equipment is limited.	
	LEARNING EXPERIENCE A learning experience is like a thoughtfully designed journey. Each activity and interaction build towards meaningful understanding and growth. Identify activities and interactions to help learner gain knowledge, skills, or understanding in a purposeful way.					
Session	1	2	3	4	5	

Scanned with CamScanner

Pre- Lesson *What will I do to help the learners get ready for the lesson?* The planned activities follow a clear step by step guided practice and independent coding tasks.	**Activity: "From Steps to Symbols"** 1. Present a simple step-by-step task, such as logging in to a computer. 2. Ask learners to identify the first, middle, and final steps. 3. Show Start/End, Process, Decision, and Flow Line symbols. 4. Ask: "How can we represent these steps visually?"	**Review Activity: "Symbol Match"** 1. Display four basic flowchart symbols. 2. Learners match each symbol with its function. 3. Present a short sequence for comparing two numbers. 4. Ask: "Where would a decision be needed?"	**Review Activity: "Algorithm Recall"** 1. Review the meaning of an algorithm and logical sequence. 2. Show an algorithm for adding two numbers. 3. Ask learners which steps are inputs, processes, and outputs. 4. Connect the algorithm to pseudocode as a bridge to coding.	**Review Activity: "Operator Quick Check"** 1. Display examples such as 10 + 5, 10 > 5, and salary >= 15000 && salary <= 30000. 2. Learners identify the operator and its purpose. 3. Ask: "How do operators help a program make calculations and decisions?"	**Review Activity: "Condition Check"** 1. Show simple conditions such as salary >= 15000 and salary >= 15000 && salary <= 30000. 2. Learners identify the relational and logical operators used. 3. Ask: "How can these conditions help a program decide whether a person qualifies for a benefit?"
Learning Experience Every strategy directly aligns with specific objective of the day. *What activities can I implement to meet the learning objectives?* *What can I do to:* • *make the objectives clear for the learners?* •*guide learners before letting them try the task on their own?* • *check the state of the learners' well-being, understanding, and mastery over the lesson?* •*connect today's new concepts to past competencies?* • *encourage collaboration among learners?* • *invite learners to reflect on why these matters to them?* • *ensure inclusion for learners' varied abilities, learning styles, and contexts?*	Review Activity: "Condition Check" 1. Show simple conditions such as salary >= 15000 and salary >= 15000 && salary <= 30000. 2. Learners identify the relational and logical operators used. 3. Ask: "How can these conditions help a program decide whether a person qualifies for a benefit?"	1. Teacher Discussion: "Flowcharting a Simple Problem" Explain how decisions are represented using a diamond and how Yes/No branches guide the program. 2. Guided Example Model: "Display the larger of two numbers." Start → Input A and B → Compare A and B → Display the larger number → End. 3. Individual Activity Learners draw the complete flowchart using correct symbols and arrows. 4. Peer Check Partners trace each other's flowchart from Start to End and identify missing or incorrect paths. 5. Sharing Selected learners explain their decision branch.	1. Teacher Discussion: "Algorithm to Pseudocode" Explain pseudocode as a plain-English representation of program logic that is easy to translate into code. 2. Guided Example Convert "Display the sum of two numbers" into: START INPUT A, B SUM ← A + B DISPLAY SUM END 3. Pseudocode Fix-It Task Provide short pseudocode	1. Teacher Discussion: "Applying Operators in Java" Review arithmetic operators (+, -, *, /, %), relational operators (>, <, >=, <=, ==, !=), and logical operators (&&, ||, !). 2. Expense Calculator Learners write a Java program that calculates total expenses and average expense, then compares the total with a set budget to display "Within Budget" or "Over Budget." 3. Conditional Salary Checker Learners assign a salary value, calculate an allowance or deduction, and	1. Teacher Discussion: "Conditional Salary Checker" Review relational operators (>, <, >=, <=, ==, !=) and logical operators (&&, ||, !), focusing on how they create conditions. 2. Guided Example Model a program that stores a salary, calculates an allowance or deduction, and checks whether the employee qualifies for a benefit. 3. Individual Programming Task Learners develop a Java program that assigns a salary value, computes an

Scanned with CamScanner

				use relational/logical operators to determine eligibility for a sample benefit condition. 4. Testing and Debugging Learners run their programs, check results, and correct errors.	
Opportunities for Integration *Are there spaces to meaningfully integrate:* • *another learning area?* • *a special topic?* • *technology?* Meaningful integration of Math, English, and Financial Literacy is also included to strengthen practical understanding.	Mathematics Integration – Use addition and comparison when translating numerical algorithms into flowcharts. ICT Integration – Use digital flowchart tools or presentation software when available. English Integration – Write clear, concise, and logically ordered steps. Values Integration – Promote accuracy, patience, cooperation, and respect for different solution approaches.	Mathematics/Logic Integration – Comparing two numbers reinforces greater-than, less-than, and equality relationships. ICT Integration – Create the flowchart digitally and present it using a computer. English Integration – Explain Yes/No branches using precise language. Values Integration – Promote confidence, cooperation, and careful checking.	English Integration – Pseudocode uses clear, concise, and understandable language. Mathematics Integration – Express addition and other simple operations in algorithmic form. ICT Integration – Connect pseudocode with the later process of writing Java code. Values Integration – Promote persistence, clarity, and willingness to revise mistakes.	Mathematics Integration – Compute totals, averages, allowances, and deductions. ICT Integration – Write and test Java programs in an IDE. Financial Literacy Integration – Compare expenses with a budget as a practical application. Values Integration – Emphasize accuracy, responsible decision-making, and careful testing	Mathematics/Financial Literacy Integration – Apply salary computations, allowances, and deductions using arithmetic operations. ICT Integration – Write, run, test, and debug the Java program in an IDE. English Integration – Write clear conditions and explain program outputs using precise language. Values Integration – Promote responsibility, accuracy, persistence, and ethical decision-making.
Formative Assessment *What task, activity, or questions can I use to evaluate learning?*	Flowchart Check • Learners convert a given	Flowchart Challenge Learners design a flowchart	Pseudocode Fix-It Learners revise a short	Java Operator Task Learners submit the	Conditional Salary Checker Learners submit and run

Formative tasks measure whether students achieved the target skills for each day through flowchart drawing, pseudocode editing, and program execution.

Scanned with CamScanner

What can we do together so that learners can tell me what kind of support they need from me?				Expense Calculator and Conditional Salary Checker. Check for: • Correct calculations – 10; • Correct relational/logical conditions – 10; • Appropriate output – 10; • Program execution/testing – 10 Exit Ticket: 1. What is the purpose of a relational operator? 2. What does && mean? 3. How can operators help a program make decisions?	
Extended Learning Opportunities *What experiences outside the classroom can I suggest to learners to reinforce what they have learned?* *What experiences might make learners more curious or engaged in this lesson?*	Learners choose one routine they perform at home and convert the steps into a flowchart. Label Start, Process, and End and include a Decision if needed.	Learners create a flowchart for another comparison problem, such as determining whether a number is positive, negative, or zero. They may draw it on paper or use a digital tool.	Learners write pseudocode for one simple task at home or school, then ask a family member or classmate to check whether the instructions are complete and easy to follow.	Learners write pseudocode for one simple task at home or school, then ask a family member or classmate to check whether the instructions are complete and easy to follow.	Learners improve their Conditional Salary Checker by adding another benefit condition or a second salary bracket. They test at least three salary values and briefly explain how each condition affects the output.
Reflecting on my teaching practice					
	Session 1	**Session 2**	**Session 3**	**Session 4**	**Session 5**
Notes for Myself and Peers *Is there anything I need to change for tomorrow based on what happened? Is there something the learners are interested in exploring?* *Are there some things I would like to share with my co-teachers, parents, or school leaders about my classroom experience?*					
Declaration of AI use *Cite how AI was used in the formulation of the lesson plan.*	This lesson plan was developed with the assistance of Artificial Intelligence (AI) tools to support the organization, enhancement, and refinement of instructional planning in alignment with the DepEd ILAW format for Opening Block instruction.				

→ Take home tasks and extended challenges are provided so students can continue practicing program logic outside the classroom.

Pres. Diosdado Macapagal High School

Form No. 1
WEEKLY MENTORING FORM

Name of Pre-service Teacher	John Rex B. Duran
Program/Section	Bachelor of Technical-Vocational Teacher Education Major in Computer Programming
Name of Cooperating School	Pres. Diosdado Macapagal High School
Name of Cooperating Teacher	Ma'am Princess R. Cenizal
Date Accomplished	
Mentoring Session No.	1

A. OUTPUT/ACTIVITY EVALUATION AND COMMENTS

INSTRUCTION: Kindly provide comments or suggestions and indicate the total score on the activity accomplished by your assigned pre-service teacher for the week. The pre-service teacher shall review the feedback and use it as a basis for reflection and continuous improvement.

Strength/s

+ studies are relevant to competency based assessment.
+ shows good understanding of the importance of assessment and rubrics.
+ Clear presentation of the problem, action and outcome.

Weakness/es

+ Limited connection to Java Programming
+ Limited comparison of the studies

Suggestion/s

+ Add studies specifically related to Java programming assessments.

Criteria-based Score

B. PRE-SERVICE TEACHER'S EVALUATION AND COMMENTS

INSTRUCTION: Evaluate the pre-service teacher's demonstrated skills in each area based on actual performance during the Field Study experience. Place a check mark (✓) under the rating that best describes the level of skill demonstrated.

Scanned with CamScanner

5 – Extremely Skilled - Demonstrates the skill consistently, independently, accurately, and effectively. Performs beyond the expected level with confidence and initiative.
4 – Moderately Skilled - Demonstrates the skill effectively and consistently with minimal guidance. Meets the expected level of performance.
3 – Developing - Demonstrates the basic skill adequately but may require occasional guidance, practice, or improvement.
2 – Needs Improvement -Demonstrates limited skill and requires frequent guidance, supervision, and practice to perform the task appropriately.
1 – Not Skilled at all - Demonstrates minimal or no evidence of the skill and requires substantial guidance and support.

MAINTAINING EFFECTIVE COMMUNICATION	5	4	3	2	1
Active listening	✓				
Receiving constructive feedback		✓			
Establishing a relationship based on trust		✓			
Identifying and accommodating different communication styles		✓			
Employing strategies to improve communication with cooperating teacher	✓				
Helping the cooperating teacher coordinate effectively with other cooperating teachers	✓				
ALIGNING EXPECTATIONS	**5**	**4**	**3**	**2**	**1**
Working with cooperating teacher to set clear expectations of the mentoring relationship	✓				
Aligning expectations with the cooperating teacher	✓				
Considering how personal and professional differences may impact expectations	✓				
Working with cooperating teacher to set goals		✓			
Developing strategies to meet goals	✓				
FOSTERING INDEPENDENCE	**5**	**4**	**3**	**2**	**1**
Motivating oneself		✓			
Building confidence	✓				
Stimulating creativity	✓				
Acknowledging professional contributions	✓				
Negotiating a path to professional independence with cooperating teacher		✓			
PROMOTING PROFESSIONAL DEVELOPMENT	**5**	**4**	**3**	**2**	**1**
Networking effectively		✓			
Setting career goals	✓				
Balancing work with personal life	✓				
Understanding impact of cooperating teacher as a role model	✓				
Acquiring resources	✓				
TOTAL SCORE	/ 20				

C. PRE-SERVICE TEACHER'S EVALUATION AND COMMENTS

INSTRUCTION: Kindly provide comments or suggestions on the performance of the pre-service teacher as a basis for reflection and continuous improvement.

Strength/s He is a kind, respectful and confident student teacher who guides the students well during their activities. According to the students, he is very

Scanned with CamScanner

helpful and approachable whenever they need assistance. His supportive attitude helps create a positive and comfortable learning environment.

Weakness/es

No specific weaknesses have been observed at this time, as the student teacher has only been in the class for one week.

Suggestions

Further observation will be needed for a more comprehensive assessment
