Task Sheet No. 1:
ACTION RESEARCH DATA BANK

INSTRUCTION:

As a group emerging teacher-researcher, you are task to develop an **Action Research Data Bank** based on actual observations and experiences during your Field Study and from the latest review or related literatures (RRL)/published action research. You will identify, document, and organize potential **classroom-based and school-based problems or concerns** that may serve as possible topics for future action research. It may be related to different classroom situations, teaching practices, learner behaviors, instructional strategies, assessment practices, and school-related concerns that you encountered. Some of these situations may indicate a gap, difficulty, recurring problem, or opportunity for improvement that can be addressed through action research. Your observations must be based on **actual Field Study experiences** and should not be based solely on assumptions or hypothetical situations. Your output will be submitted to your Field Study Instructor/Professor and may be used as a reference when developing a future Classroom-Based Action Research (CBAR) proposal.

RUBRIC FOR GRADING:

CRITERIA	EXCELLENT	PROFICIENT	DEVELOPING	BEGINNING
Thematic Area and Context (20%)	Clearly identifies an appropriate thematic area and provides a specific, relevant, and well-contextualized description of the classroom/school situation where the concern was observed.	Identifies an appropriate thematic area and provides a clear description of the relevant classroom/school context.	Identifies a thematic area and provides a general context, but important details or connections are lacking.	The thematic area or context is unclear, inappropriate, not connected or missing.
Identification of Research Concerns/Problem (25%)	Identifies 10 or more specific, relevant, and clearly researchable concerns/problem based on actual Field Study experiences and RRL	Identifies at least 8-10 relevant concerns/problem and RRL, with most being specific and potentiality.	Identifies at least 5-7 concerns and/or RRL and several concerns/problem are broad, unclear, or difficult to research.	Identifies less than 5 concerns/problem and RRL, which are mostly vague, unrelated, or not researchable.
Identification and Analysis of the Problem, Solution, and Outcome (25%)	Clearly identifies a specific and observable educational concern and provides thoughtful analysis of its possible causes, solution, and effects.	Clearly identifies the concern and provides an adequate explanation of its possible causes, solution, or effects.	Identifies the concern, solution, and outcome but provides limited analysis or relies mainly on description.	Concern, solution, and outcome is vague, unsupported, or difficult to identify.
Alignment of Components (20%)	Demonstrates strong and logical alignment among the thematic area, context, identified concern, and proposed solution/action plan.	Shows clear alignment among most of the required components but not all.	Shows partial alignment, with some inconsistencies among the components.	Components are disconnected or demonstrate little logical relationship.
Organization and Completeness (10%)	All required components are complete, logically organized, coherent, and presented clearly.	Required components are complete and generally well organized.	Some components are incomplete or inconsistently organized.	Several required components are missing or poorly organized.

Suggested Proposal Title	Developing Competency-Based Assessment and Rubrics to Strengthen Java Programming Skills of Grade 12 Senior High School ICT Tech Pro Learners
Research Agenda or Thematic Area/s	For Teaching and Learning
Research Focus	Assessment
Name of Proponents	Arellano, Ailyn P. – ICT Electronics Technology Duran, John Rex B. – ICT Computer Programming Porteria, Kimberlie Crissel F. – ICT Computer Programming
Name of Adviser	Under Consultation

Activity 1: Write your answer in the space provided.

Action Research Titles	Author/s (APA Format)	Thematic Area/ Context	Summary (Problem, Action Plan, and Outcome)
Example: Differentiated Instruction in teaching TLE for Grade 8 Classes		Thematic Area: Teaching and Learning Focus: Instruction Context: Describe briefly	Problem: Action/Solution: Outcome:
1. Assessing Pedagogical Students' Learning Outcomes Through A Competency-Based Approach.	Nguyen, T. K. A., Ho, Q. H., & Nguyen, T. H. P. (2024). Assessing pedagogical students' learning outcomes through a competency-based approach. *Educational Administration: Theory and Practice, 30*(5), 7767–7776.	Thematic Area: Focus: Instruction Context:	**Problem:** There is a need to improve lecturers' competence in assessing students' learning outcomes. Existing assessment methods were also identified as needing to be newer and fairer. **Action/Solution:** Develop and implement new, effective, and fair assessment methods, while providing lecturers with the necessary tools and skills to use them. **Outcome:** It concluded that improving their assessment capabilities through better assessment methods, tools, and skills is essential for improving the quality of education and training.

2. Teaching Strategies and Their Effects on Competency Assessment Performance of Senior High School Students	Mariano Marcos State University Researchers. (2025). Teaching strategies and their effects on competency assessment performance of senior high school students. International Journal of Research and Innovation in Social Science, 9 355–362.	Thematic Area: Teaching and Learning Focus: Instructional Strategies Context: Senior High School TVL Strand	**Problem:** Traditional lecture-based methods limited student competency outcomes. **Action Plan:** Compared demonstration, lecture, and laboratory-based strategies in SHS classes. **Outcome:** 73% of 890 students achieved competency; demonstration and lab-based learning proved most effective, though innovative methods (flipped classrooms, virtual labs) were underutilized.
3. Effects of Authentic Assessment Practices on Students' Skill Acquisition in TVL-HE Bread and Pastry Production: A Quasi-Experimental Study	Guevarra, R. G., & Birj, M. B. (2026). Effects of authentic assessment practices on students' skill acquisition in TVL-HE bread and pastry production: A quasi-experimental study. ResearchGate.	Thematic Area: Teaching and Learning Focus: Assessment and Skill Development Context: Senior High School TVL-HE Strand	**Problem:** Traditional written tests fail to measure psychomotor skills in Bread and Pastry Production. **Action Plan:** Applied authentic assessment (performance tasks, industry-aligned rubrics, formative feedback) using a quasi-experimental design. **Outcome:** Experimental group scored significantly higher (M = 86.56) than control group (M = 68.43); authentic assessment strengthened technical competence, product quality, safety practices, and workplace readiness.
4. In-House Enhancement Training Employing Competency-Based Training (CBT) Approach on Grade 12 TVL-ICT-CSS Practical Performance	Regañon, A. B. (2021). *In-house enhancement training employing competency-based training (CBT) approach on Grade 12 TVL-ICT-CSS practical performance*. Department of Education, Region IX.	Thematic Area: Teaching and Learning Focus: Instruction Context: Grade 12 TVL-ICT-CSS learners at Rizal National High School during modular distance learning.	**Problem:** CSS performance tasks needed clear assessment criteria. **Action/Solution:** The researcher developed task-based analytic rubrics. **Outcome:** Experts rated the rubrics highly acceptable, and learner performance improved.

5. Enhancing Learners' Performance Through Task-Based Analytic Rubrics in Computer System Servicing	Balajadia, J. L. (2025). Enhancing learners' performance through task-based analytic rubrics in computer system servicing. *FMDB Transactions on Sustainable Techno Learning, 3*(2), 72–80.	Thematic Area: Teaching and Learning Focus: Instruction Context: Grade 10 TLE CSS learners at Baras-Pinugay Integrated High School.	**Problem:** The study identified low performance and a need for clear criteria to assess CSS tasks. **Action/Solution:** The researcher developed and evaluated task-based analytic rubrics for CSS performance tasks. **Outcome:** Experts rated the rubrics highly acceptable, and learner performance improved after they were used.
6. Utilization of Competency-Based Training Approach in Teaching Computer System Servicing in Public High Schools	Bagnes, J. M. (2026). Utilization of competency-based training approach in teaching computer system servicing in public high schools. *International Journal of Innovative Science and Research Technology, 11*(5), 1334–1344.	Thematic Area: Teaching and Learning Focus: Assessment Context: Philippine Higher Education	**Problem:** CBT implementation faced resource, industry-alignment, and assessment-tool challenges. **Action/Solution:** The researcher surveyed CSS teachers and proposed an instructional enhancement package. **Outcome:** Teachers reported moderate to high CBT use, while institutional and resource needs remained.
7. Competency-based assessment in educational contexts for the comprehensive development of meaningful learning	Salvador-Hernández, H. (2026). Competency-based assessment in educational contexts for the integral development of meaningful learning. *EDUNEXA, 3*(1), 17–26.	Thematic Area: Teaching and Learning Focus: Assessment Context: Philippine Higher Education	**Problem:** Traditional assessment faces challenges such as unclear criteria, limited teacher training, and resistance to new assessment practices. **Action/Solution:** Implement competency-based assessment using rubrics, projects, and evidence portfolios. **Outcome:** Competency-based assessment supports meaningful learning, better feedback, and more comprehensive evaluation of student performance.

8. The Competency-Based Approach in Education: Concept, Principles, and Implications for Contemporary Teaching and Learning Authors	Attantani, A. S., & Algahwash, F. Z. (2026). The competency-based approach in education: Concept, principles, and implications for contemporary teaching and learning. *Al-Farooq Journal of Sciences, 2*(Suppl. 3), 2641–2664.	Thematic Area: Teaching and Learning Focus: Assessment Context: Philippine Higher Education	**Problem:** Traditional education may focus too much on knowledge transmission rather than developing and demonstrating integrated competencies. **Action/Solution:** Apply competency-based education through clearly defined competencies, authentic assessment, continuous feedback, and alignment of teaching and assessment. **Outcome:** CBE can connect learning with professional practice, clarify expectations, and promote learner engagement and lifelong learning.
9. From Readiness to Competence: A Longitudinal Study on the TESDA Bread and Pastry Production NC II Assessment Performance of Senior High School Learners	Estipona, J. D. R., Bardolaza, J. G., & Bulaqueña, L. M. (2026). From readiness to competence: A longitudinal study on the TESDA Bread and Pastry Production NC II assessment performance of senior high school learners. *International Journal of Research Publication and Reviews, 7*(5), 12600–12605.	Thematic Area: Teaching and Learning Focus: Instruction Context: Grade 12 Bread and Pastry Production NC II learners at Antipolo City Senior High School preparing for TESDA assessment.	**Problem:** Some learners experienced difficulty with assessment procedures, practical task recall, time pressure, and confidence during national assessment. **Action/Solution:** The school used orientation sessions, recipe drills, sanitation and safety reinforcement, and a School-Based Institutional Assessment to prepare learners. **Outcome:** Most candidates were Competent. Learners reported that the preparation activities helped them understand assessment procedures and feel more confident.
10. Objective Assessment in Java Programming Language Using Rubrics	Gupta, P., & Mehrotra, D. (2022). Objective assessment in Java programming language using rubrics. *Journal of Information Technology Education: Innovations in Practice, 21*, 155–173.	Thematic Area: Teaching and Learning Focus: Assessment Context: Philippine Higher Education	**Problem:** General assessment results may not show strengths and gaps across Java programming skills. **Action/Solution:** The researchers developed a Java rubric and used it to

			give skill-specific feedback. **Outcome:** Learners showed stronger syntax and concept knowledge, but needed more practice in logic, critical thinking, code optimization, and application design.

ACTIVITY 2: Read and analyze the guide questions below. Write your answers in column B.

Guide Questions:	
1. What did you notice about the titles of the action research? What are the common problems to be solved?	I noticed that the common of the researches is in the academic settings. The problems are identified inside the educational institutions. The common issues revolve around teaching and learning practices, especially the lack of effective assessment methods and the need to improve student performance.
2. What are the common solutions proposed in the problem?	They implemented a competency-based assessment to measure the skills gained by the students and the effectiveness of the competency-based framework.
3. What do you think about the intention of the teacher-researchers in conducting the research?	The intention of the teacher-researchers in doing the research is to find real problems inside the school, like the gap between the learning competencies given by DepEd and the actual skills learned by students. By using the Budget of Work as their guide, they want to make sure that the assessments are aligned with the competencies so that the learning outcomes are really achieved. Their goal is not only to suggest solutions but also to apply competency-based assessments that can show clear evidence if the students have mastered the skills required.
4. What significant ideas or concepts did you learn from the activity?	From this activity, I learned the idea that action research is a practical tool for teachers to improve classroom practice. It follows a cycle of planning, implementing, observing, and reflecting, which ensures continuous improvement. I also realized the importance of competency-based training and assessment tasks in developing students' practical skills, especially in ICT Tech Pro where hands-on performance is more valuable than theoretical knowledge. Another key concept is the use of rubrics to provide clear and fair criteria in evaluating student outputs, making assessment more objective and aligned with learning competencies.
5. What do you think would be the benefit of conducting action research in your career as future educator?	Conducting action research will benefit my career as a future educator because it will help me continuously improve my teaching practices based on real classroom experiences. Through action research, I

	can directly identify problems in student learning, create interventions, and evaluate their effectiveness using evidence. This process will make me a reflective teacher, capable of adjusting strategies to meet my learners' needs more effectively. Also beyond my personal growth, I believe action research also contributes to school improvement, since the findings can be shared with colleagues to promote collaboration and innovation in teaching. In this way, action research ensures that my teaching is not only grounded in theory but also responsive to the actual needs of my students.

Republic of the Philippines
Department of Education
Schools Division Office of Taguig-Pateros
Pres. Diosdado Macapagal High School

Form No. 1
WEEKLY MENTORING FORM

Name of Pre-service Teacher	John Rex B. Duran
Program/Section	Bachelor of Technical-Vocational Teacher Education Major in Computer Programming
Name of Cooperating School	Pres. Diosdado Macapagal High School
Name of Cooperating Teacher	Ma'am Princess R. Cenizal
Date Accomplished	
Mentoring Session No.	1

A. OUTPUT/ACTIVITY EVALUATION AND COMMENTS

INSTRUCTION: Kindly provide comments or suggestions and indicate the total score on the activity accomplished by your assigned pre-service teacher for the week. The pre-service teacher shall review the feedback and use it as a basis for reflection and continuous improvement.

Strength/s

+ studies are relevant to competency based assessment.
+ shows good understanding of the importance of assessment and rubrics.
+ Clear presentation of the problem, action and outcome.

Weakness/es

+ Limited connection to Java Programming
+ Limited comparison of the studies

Suggestion/s

+ Add studies specifically related to Java programming assessments.

Criteria-based Score

B. PRE-SERVICE TEACHER'S EVALUATION AND COMMENTS

INSTRUCTION: Evaluate the pre-service teacher's demonstrated skills in each area based on actual performance during the Field Study experience. Place a check mark (✓) under the rating that best describes the level of skill demonstrated.

Scanned with CamScanner

5 – Extremely Skilled - Demonstrates the skill consistently, independently, accurately, and effectively. Performs beyond the expected level with confidence and initiative.
4 – Moderately Skilled - Demonstrates the skill effectively and consistently with minimal guidance. Meets the expected level of performance.
3 – Developing - Demonstrates the basic skill adequately but may require occasional guidance, practice, or improvement.
2 – Needs Improvement -Demonstrates limited skill and requires frequent guidance, supervision, and practice to perform the task appropriately.
1 – Not Skilled at all - Demonstrates minimal or no evidence of the skill and requires substantial guidance and support.

MAINTAINING EFFECTIVE COMMUNICATION	5	4	3	2	1
Active listening	✓				
Receiving constructive feedback		✓			
Establishing a relationship based on trust		✓			
Identifying and accommodating different communication styles		✓			
Employing strategies to improve communication with cooperating teacher	✓				
Helping the cooperating teacher coordinate effectively with other cooperating teachers	✓				
ALIGNING EXPECTATIONS	**5**	**4**	**3**	**2**	**1**
Working with cooperating teacher to set clear expectations of the mentoring relationship	✓				
Aligning expectations with the cooperating teacher	✓				
Considering how personal and professional differences may impact expectations	✓				
Working with cooperating teacher to set goals		✓			
Developing strategies to meet goals	✓				
FOSTERING INDEPENDENCE	**5**	**4**	**3**	**2**	**1**
Motivating oneself		✓			
Building confidence	✓				
Stimulating creativity	✓				
Acknowledging professional contributions	✓				
Negotiating a path to professional independence with cooperating teacher		✓			
PROMOTING PROFESSIONAL DEVELOPMENT	**5**	**4**	**3**	**2**	**1**
Networking effectively		✓			
Setting career goals	✓				
Balancing work with personal life	✓				
Understanding impact of cooperating teacher as a role model	✓				
Acquiring resources	✓				
TOTAL SCORE	/ 20				

C. PRE-SERVICE TEACHER'S EVALUATION AND COMMENTS

INSTRUCTION: Kindly provide comments or suggestions on the performance of the pre-service teacher as a basis for reflection and continuous improvement.

Strength/s He is a kind, respectful and confident student teacher who guides the students well during their activities. According to the students, he is very

Scanned with CamScanner

helpful and approachable whenever they need assistance. His supportive attitude helps create a positive and comfortable learning environment.

Weakness/es

No specific weaknesses have been observed at this time, as the student teacher has only been in the class for one week.

Suggestions

Further observation will be needed for a more comprehensive assessment
