Task Sheet No. 3:
COMPETENCIES ALIGNMENT MATRIX

INSTRUCTION:

As a pre-service teacher, you are tasked to prepare and submit a **Competencies Alignment Matrix** based on an actual or assigned Budget of Work (BoW)/Curriculum Guide/MELCs. Your goal is to examine the competencies, identify the expected learning outcomes, and formulate appropriate objectives that are aligned with the content, skills, and performance expectations for the lesson. The matrix should clearly present the BOW competency and its corresponding lesson objectives, demonstrating alignment between what learners are expected to learn and what they are expected to demonstrate. Your work will serve as a practical guide for lesson planning and will be evaluated based on the accuracy of alignment, clarity and measurability of objectives, relevance to the competencies, and organization of the output.

Note: *This task would help you accomplish the INTENTIONS, LEARNING EXPERIENCE, and ASSESSING LEARNING part of your lesson plan.*

10/12/24

RUBRIC FOR GRADING:

CRITERIA	EXCELLENT	PROFICIENT	DEVELOPING	BEGINNING
Competency alignment (30%)	All objectives are strongly and accurately aligned with the BOW/CG/MELCs competencies; alignment is clear and logical.	Most objectives are accurately aligned with the BOW/CG/MELCs competencies with minor inconsistencies.	Some objectives are aligned, but several connections to the BOW/CG/MELCs competencies are unclear or inaccurate.	Objectives show little or no alignment with the BOW/CG/MELCs competencies.
Clarity and measurability of objectives (30%)	Objectives are exceptionally clear, SMART, and use appropriate action verbs.	Objectives are clear and SMART, with minor issues in specificity or action verbs.	Objectives are somewhat clear but not SMART and contain vague or difficult-to-measure statements.	Objectives are unclear, vague, or not measurable.
Relevance to the learning outcomes (30%)	Objectives directly address the expected knowledge, skills, and performance indicated in the competencies.	Objectives generally address the expected learning outcomes with minor gaps.	Objectives address some expected outcomes but miss important knowledge or skills.	Objectives do not adequately reflect the expected learning outcomes.
Completeness and Accuracy (10%)	All required competencies and corresponding objectives are complete, accurate, and appropriately matched.	The output is mostly complete and accurate, with only minor omissions or errors.	Several competencies or objectives are incomplete or contain errors.	The output is substantially incomplete or contains major errors.

Activity 1: Write your answer in the space provided.

COMPETENCIES	CONTENT AND PERFORMANCE STANDARD	LEARNING OBJECTIVES	INTENDED LEARNING OUTCOMES (OUTPUT)
Refer to the Curriculum Guide/MELCs/Budget of Work		*Refer to Blooms Taxonomy and other guidelines in creating your objectives (Knowledge, Skill, and Attitude)*	*It could be an activity/output that could be assessed (formative or summative)*
1. Discuss the fundamental concepts of Java.	**Performance Standard:**The learners perform procedures in setting up the Integrated Development Environment (IDE) and in creating algorithms, flowcharts, and pseudocode to plan and visualize their code. The learners create a well-structured program using Java Operators, input and output classes, flow control structures, and arrays. The learners create a well-structured and efficient program using Java flow control structures, Java arrays, and Java Object-Oriented Programming (OOP) language. **Content Standard:** • The learners demonstrate an understanding of Java programming, including basic structure, syntax,	• Explain the foundational components of a Java program, including the class structure, main method, variables, data types, and comments. • Label the essential elements of a given Java code snippet. • Adhere to standard Java naming conventions and syntax rules during code construction.	**Java Concepts Quick Map** Learners create a simple concept map showing how foundational Java concepts such as program structure, class definitions, main method execution, data types, variables, and comments relate to one another in a working program.

	data types, variables, and comments. They also develop skills in creating algorithms, flowcharts, and pseudocode to plan and visualize their code before implementation. • The learners demonstrate an understanding of Java Operators, Input/Output (I/O) classes, flow control structures, and arrays to solve real-world problems.		
2. Develop flowcharts for designing a program or system.	**Performance Standard:** The learners perform procedures in setting up the Integrated Development Environment (IDE) and in creating algorithms, flowcharts, and pseudocode to plan and visualize their code. The learners create a well-structured program using Java Operators, input and output classes, flow control structures, and arrays. The learners create a well-structured and efficient program using Java flow control structures, Java arrays, and Java Object-Oriented Programming (OOP) language.	• Explain the standard flowchart symbols and their specific functions in visual program logic. • Construct a logical flowchart that visually represents the step-by-step solution to a given programming problem or system requirement. • Display precision and neatness in using standard flowcharting conventions to ensure clear readability for peer developers.	**Program Logic Diagramming Performance Rubric & Worksheet** Learners take a provided step-by-step algorithm and draw the corresponding flowchart using correct standard symbols (start/end, process, decision, input/output) and directional arrows.

	Content Standard: • The learners demonstrate an understanding of Java programming, including basic structure, syntax, data types, variables, and comments. They also develop skills in creating algorithms, flowcharts, and pseudocode to plan and visualize their code before implementation. • The learners demonstrate an understanding of Java Operators, Input/Output (I/O) classes, flow control structures, and arrays to solve real-world problems.		
3. Apply operators in writing a Java program.	**Performance Standard:**The learners perform procedures in setting up the Integrated Development Environment (IDE) and in creating algorithms, flowcharts, and pseudocode to plan and visualize their code. The learners create a well-structured program using Java Operators, input and output classes, flow control structures, and arrays. The learners	• Classify the different categories of Java operators (arithmetic, relational, logical, assignment, and unary) based on their syntax and functional behavior. • Construct a functional Java program that utilizes various operators to compute calculations and evaluate logical expressions. • Practice care and accuracy when sequencing	**Operator Expression Evaluation Lab** Given various code snippets containing arithmetic, comparison, and compound logical expressions, learners evaluate and trace the expected output step-by-step prior to running the code in the IDE.

Department of Education
Schools Division Office of Taguig-Pateros
Pres. Diosdado Macapagal High School

Form No. 1
WEEKLY MENTORING FORM

Name of Pre-service Teacher	John Rex B. Duran
Program/Section	Bachelor of Technical-Vocational Teacher Education Major in Computer Programming
Name of Cooperating School	Pres. Diosdado Macapagal High School
Name of Cooperating Teacher	Ma'am Princess R. Cenizal
Date Accomplished	10/12/26
Mentoring Session No.	2

A. OUTPUT/ACTIVITY EVALUATION AND COMMENTS

INSTRUCTION: Kindly provide comments or suggestions and indicate the total score on the activity accomplished by your assigned pre-service teacher for the week. The pre-service teacher shall review the feedback and use it as a basis for reflection and continuous improvement.

Strength/s

The learning plan has clear competencies, measurable objectives and practical activities that develop Java programming and problem-solving skills.

Weakness/es

Some standards are broad and repetitive

Suggestion/s

Improve alignment among objectives, activities and assessments.

Criteria-based Score

B. PRE-SERVICE TEACHER'S EVALUATION AND COMMENTS

INSTRUCTION: Evaluate the pre-service teacher's demonstrated skills in each area based on actual performance during the Field Study experience. Place a check mark (✓) under the rating that best describes the level of skill demonstrated.

Scanned with CamScanner

5 – Extremely Skilled - Demonstrates the skill consistently, independently, accurately, and effectively. Performs beyond the expected level with confidence and initiative.
4 – Moderately Skilled - Demonstrates the skill effectively and consistently with minimal guidance. Meets the expected level of performance.
3 – Developing - Demonstrates the basic skill adequately but may require occasional guidance, practice, or improvement.
2 – Needs Improvement -Demonstrates limited skill and requires frequent guidance, supervision, and practice to perform the task appropriately.
1 – Not Skilled at all - Demonstrates minimal or no evidence of the skill and requires substantial guidance and support.

MAINTAINING EFFECTIVE COMMUNICATION	5	4	3	2	1
Active listening	✓				
Receiving constructive feedback		✓			
Establishing a relationship based on trust	✓				
Identifying and accommodating different communication styles		✓			
Employing strategies to improve communication with cooperating teacher	✓				
Helping the cooperating teacher coordinate effectively with other cooperating teachers	✓				
ALIGNING EXPECTATIONS	**5**	**4**	**3**	**2**	**1**
Working with cooperating teacher to set clear expectations of the mentoring relationship	✓				
Aligning expectations with the cooperating teacher	✓				
Considering how personal and professional differences may impact expectations	✓				
Working with cooperating teacher to set goals	✓				
Developing strategies to meet goals		✓			
FOSTERING INDEPENDENCE	**5**	**4**	**3**	**2**	**1**
Motivating oneself	✓				
Building confidence	✓				
Stimulating creativity		✓			
Acknowledging professional contributions	✓				
Negotiating a path to professional independence with cooperating teacher	✓				
PROMOTING PROFESSIONAL DEVELOPMENT	**5**	**4**	**3**	**2**	**1**
Networking effectively	✓				
Setting career goals	✓				
Balancing work with personal life	✓				
Understanding impact of cooperating teacher as a role model	✓				
Acquiring resources		✓			
TOTAL SCORE	/ 20				

C. PRE-SERVICE TEACHER'S EVALUATION AND COMMENTS

INSTRUCTION: Kindly provide comments or suggestions on the performance of the pre-service teacher as a basis for reflection and continuous improvement.

Strength/s
* He is helpful and supportive during student activities

Scanned with CamScanner

* Provides clear instructions and guidance to learners
* Demonstrates patience in answering student's questions

Weakness/es

* His voice is slightly soft

Suggestions

* Speak a little louder and maintain clear voice to ensure that all students can hear the instructions.
