Task Sheet No. 6:
DAILY LESSON PLAN WITH INSTRUCTIONAL MATERIAL INTEGRATION AND ICT APPS

INSTRUCTION:

As a pre-service teacher, you are tasked to develop a **detailed lesson plan** based on the identified learning competencies, standards, objectives, and content area. Using the prescribed lesson plan format (follow the ILAW Framework), design a learning experience that demonstrates clear alignment among the learning intentions, learning activities, instructional materials, ICT integration, assessment strategies, and intended learning outcomes. The lesson should maximize opportunities for integration and contextualization and should be inclusive and responsive to learners with diverse abilities, learning needs, cultures, barriers, and unique contexts.

Your completed lesson plan will serve as a professional teaching document that another teacher can implement with minimal or no additional explanation. Ensure that the learning experiences are logically sequenced, the instructional materials and ICT resources are appropriate and effectively utilized, and assessment strategies provide evidence of learners' progress and achievement. Include appropriate ways forward and interventions based on learners' performance and reflection. Submit the completed lesson plan within the prescribed period for evaluation and feedback.

RUBRIC FOR GRADING:

CRITERIA	EXCELLENT	PROFICIENT	DEVELOPING	BEGINNING
Intensions (10%)	Intentions are clearly and appropriately stated, with relevant learning competencies accurately articulated. Strong coherence and alignment are evident across all sections of the DLL.	Intentions are clearly stated, with appropriate learning competencies articulated. Coherence and alignment are evident across most sections of the DLL, with only minor inconsistencies.	Intentions are partially stated, and the learning competencies are somewhat appropriate but may require clarification. There are inconsistencies across several sections.	Intentions are unclear, incomplete, or inappropriate, and the learning competencies are not articulated. Little or no alignment is evident across the sections of the DLL.
Instructional Materials (20%)	ICT and other learning resources/materials are carefully selected, well-prepared, and effectively utilized. They are highly appropriate to the learners, strongly aligned with the learning intentions (competencies, standards, and objectives), and directly support the content and intended learning outcomes.	ICT and other learning resources/materials are appropriately selected, prepared, and utilized. They are aligned with the learning intentions and content area and generally support learners in achieving the intended outcomes.	ICT and other learning resources/materials are partially appropriate or inconsistently utilized. Alignment with the learning intentions and content area is evident but has some gaps, limiting their effectiveness in supporting learning.	ICT and other learning resources/materials are inappropriate, insufficiently prepared, or minimally utilized. They show little or no alignment with the learning intentions and content area and provide limited support for learning
Learning Experience Design (10%)	The learning experience is clear, detailed, and logically sequenced. Another teacher can implement	The learning experience is clear and logically organized. Another teacher can implement the lesson	The learning experience is partially clear or inconsistently organized. Another teacher may require	The learning experience is unclear, incomplete, or poorly organized. Another teacher would require

Scanned with CamScanner

	the lesson independently without additional explanation. Learning design principles are intentionally and consistently embedded throughout the lesson.	with minimal clarification. Learning design principles are appropriately embedded in most parts of the lesson.	additional explanation to implement some parts. Learning design principles are partially evident.	substantial explanation to implement the lesson. Learning design principles are not evident or appropriately embedded.
Learning Experience for Opportunities and Inclusivity (20%)	The learning experience maximizes available opportunities for integration and contextualization. Instructional materials and activities are highly relevant to different learners' styles and are inclusive and responsive to learners with disabilities, barriers, and diverse culture or unique contexts.	The learning experience provides appropriate opportunities for integration and contextualization. Instructional materials and activities are relevant to different learners' styles and are inclusive and responsive to most learners with disabilities, barriers, and diverse culture or unique contexts.	The learning experience provides some opportunities for integration and contextualization. Instructional materials and activities are somewhat relevant to different learners' styles and are partially inclusive and responsive to learners with disabilities, barriers, and diverse culture or unique contexts.	The learning experience provides limited opportunities for integration and contextualization. Instructional materials and activities are not sufficiently relevant to different learners styles and are limited in being inclusive and responsive to learners with disabilities, barriers, and diverse culture or unique contexts.
Assessment Strategies (20%)	Assessment strategies are intentionally integrated throughout the session and effectively monitor learners' progression. They generate clear and sufficient evidence of whether learning outcomes have been achieved and inform subsequent teaching decisions.	Assessment strategies are integrated at appropriate points in the session and provide evidence of learners' progress and achievement. The results generally support instructional decisions.	Assessment strategies are present but inconsistently integrated. They provide limited evidence of learners' progression or achievement and only partially inform instructional decisions.	Assessment strategies are limited, inappropriate, or disconnected from the learning experience. They provide little or no evidence of learners' progress or achievement.
Ways Forward and Interventions (20%)	Ways forward and interventions are specific, practical, and actionable, clearly indicating how learning will be extended, enriched, or adjusted based on learner performance and reflection.	Ways forward and interventions are appropriate and actionable, providing reasonable adjustments or extensions based on learner performance and reflection.	Ways forward and interventions are general or partially actionable. Connections to learner performance and reflection are limited.	Ways forward and interventions are unclear, impractical, or absent, with little evidence that learner performance or reflection informs subsequent learning.

Task Sheet No. 6
DAILY LESSON PLAN

Lesson Title	Computer Number Systems
Learning Area/s	TLE-ICT
Name of Student Teacher/s	John Rex B. Duran
Name of Cooperating Teacher	Ferdinand S. Baltazar
Grade Level and Section	Grade 7 - Jeremiah, Kings, and Leviticus
No. of Sessions	1
References	DepEd's TLE: ICT Grade 7 Three-Term Budget of Work for Learning
Books, websites, toolkits, etc.	Competencies
Declaration of AI use	This lesson plan was developed using AI and subsequently reviewed
Cite how AI was used in the formulation of the lesson plan. See DO3. 2. 2026 Annex A	for accuracy and alignment with curriculum standards.

Intentions

Meaningful learning experiences are anchored in how we frame them. Start by deciding what you want learners to master by the end of the lesson – keep it clear and simple.
Remember: Understanding your learner's evolving context and designing around it ensure that your lessons connect with and are relevant to them.

Learning Competency and Curriculum Standards: *Write the competency/ies from the curriculum that we are targeting, and the content or performance standards applicable to the sessions*	**Learning Competency:** • Differentiate the various computer number systems. **Content Standards:** The learners should have knowledge and understanding of: • Demonstrate an understanding of the computer number systems. **Performance Standards:** By the end of the term, the learners are able to: • The learners convert number systems in practical scenarios.
Learning Objectives: *Write the smaller knowledge, skills, or tasks from the competency that the learners will*	• Identify and define the four major computer number systems. • Differentiate the number systems based on their bases, allowable digits, and practical use in computing.

Scanned with CamScanner

work on and be able to show by the end of the sessions.	• Appreciate the importance of accuracy and precision when working with computer number systems to avoid technical errors.
Learner Context: *Write your observations of your learners, and how they have been performing or responding to learning experiences recently. Include strengths, interests, and possible barriers to learning.*	

Learning Experience

Learning experience is like a thoughtfully designed journey. Each activity and intersection builds towards meaningful understanding and growth. Identify activities and interactions to help learners gain knowledge, skills, or understanding in a purposeful and coherent way.

	TEACHER'S ACTIVITY	STUDENT'S ACTIVITY
Pre-Lesson: *Describe how you will help the learner get ready for the lesson.*	Greet students	Greet the teacher
	Ask one student to lead the prayer	A student leads the prayer
	Check the student attendance	Listen attentively and affirm attendance
	The "Secret Code"	
	Flashes a sequence of 1s and 0s on the Smart TV using a slide.	Observe the binary sequence on the screen.
	"If you look under the hood of your smartphones or computers, do you think they read letters and words the way we do, or do they speak a different language?"	Share initial guesses and ideas.
	Facilitates a brief discussion connecting our everyday counting to how computers process data.	Participate by giving examples of where numbers are used daily.
	"By the end of the lesson, the students will be able to:	Listen attentively and note the learning objectives for the day.

Scanned with CamScanner

	• Identify and define the four major computer number systems. • Differentiate the number systems based on their bases, allowable digits, and practical use in computing. • Appreciate the importance of accuracy and precision when working with computer number systems to avoid technical errors."	
Lesson Flow: *Describe the activities that you can implement in 1 or more session to meet your intentions.* Apply the Learning Design Principles, use the prompts below as a guide. Note, not all principles are expected in every lesson. • *Make the objectives clear for the learners* • *Guide learners before letting them try the task on their own* • *Check the state of the learners' well-being, understanding, and mastery over the lesson* • *Connect today's new concepts to past competencies* • *Encourage collaboration among learners* • *Invite learners to reflect on why this matter to them* • *Ensure inclusion for learners' varied abilities, learning styles, and contexts*	**Slides Presentation** **Decimal** (Base 10): Digits 0–9 (Human use). **Binary** (Base 2): Digits 0, 1 (Computer processors/switches). **Octal** (Base 8): Digits 0–7 (Historical computing shorthand). **Hexadecimal** (Base 16): Digits 0–9, A–F (Memory/color codes like #FFFFFF). **Group Challenge** Divides the class into small groups. Presents practical computing scenarios on the Smart TV. **Group Share-back** Calls on selected groups to briefly share their findings with the class. Provides constructive feedback and bridges theory to real-world technician contexts. "Humans use Decimal, computers rely on Binary, and tech	Follow along with the presentation on the Smart TV. Take down short notes on the bases and allowable digits of each system. Work collaboratively in small groups to analyze the given technical scenario. Identify which number system applies and discuss why it is used. Present group answers to the class. Listen to peer explanations and ask clarifying questions.

Scanned with CamScanner

	professionals use Octal and Hexadecimal for shorthand and efficiency."	Reflect on the summary and write down key takeaways in notebooks.
Learning Resources: *List down the learning resources that will help you reach your objectives. Ensure that they are available and inclusive.* *Include options and alternatives in case of emergencies.*	• Smart TV • Slides	• Paper • Paper and pencil • Smartphones
Opportunities for Integration and Contextualization: *Write down any possibilities to meaningfully connect to another learning area, special topic, local context, or technology. Write N/A if none.*	Connect Binary (ON/OFF or 1s and 0s) to how local traffic light systems, automated school bells, or smart home gadgets in the Philippines operate using basic computerized logic circuits.	

Assessing Learning

Assessments reveal what learners have gained and what they still need help with. These are helpful in providing you with information to guide your future instruction throughout the entire session.

	TEACHER'S ACTIVITY	STUDENT'S ACTIVITY
Formative Assessment: *Create a task, activity or questions to assess learning and provide feedback every now and then. Include ways for learners to ask for guidance or support throughout each session.* *Remember to provide appropriate accommodation so all learners can demonstrate their understanding (e.g. varied response formats, small group options, visual or auditory supports).*	Instructs students to clear their desks, distributes/displays the 5-item quiz, and monitors the room.	Clear desks, take out paper and pencil, and independently answer the 5-item evaluation quiz.

Ways Forward

Scanned with CamScanner

Meaningful learning can also happen beyond the classroom – for both the learners and the teacher. Pause and reflect on what happened today.

	TEACHER'S ACTIVITY	STUDENT'S ACTIVITY
Extended Learning Opportunities: *Suggest other learning experiences outside the classroom/class hours that learners may want to access to reinforce what they have learned, to spark their curiosities further, or that may provide them support in their areas of difficulty.*	Encourage students to spot and list any digital appliances or devices at home (like remote controls, microwave displays, or smart TVs) that rely on behind-the-scenes number systems to function, and briefly discuss them with family members.	
Reflections: *Think about what you need to change for the next session based on what happened today. Is there something the learners are interested in exploring?* *Are there some things you would like to share with your co-teachers, parents, or school leaders about your classroom experience? What would you like your instructional coach to help you with?* *Reflections may be written in brief notes, bullets, or annotations.*

Form No. 1
WEEKLY MENTORING FORM

Name of Pre-service Teacher	John Rex B. Duran
Program/Section	Bachelor of Technical-Vocational Teacher Education Major in Computer Programming
Name of Cooperating School	Pres. Diosdado Macapagal High School
Name of Cooperating Teacher	Ferdinand S. Baltazar
Date Accomplished	Oct. 22, 2026
Mentoring Session No.	3

A. OUTPUT/ACTIVITY EVALUATION AND COMMENTS

INSTRUCTION: Kindly provide comments or suggestions and indicate the total score on the activity accomplished by your assigned pre-service teacher for the week. The pre-service teacher shall review the feedback and use it as a basis for reflection and continuous improvement.

Strength/s

He recognizes guidances and supervision.

Weakness/es

Suggestion/s

He needs more effort, leave a good start.

Criteria-based Score

B. PRE-SERVICE TEACHER'S EVALUATION AND COMMENTS

INSTRUCTION: Evaluate the pre-service teacher's demonstrated skills in each area based on actual performance during the Field Study experience. Place a check mark (✓) under the rating that best describes the level of skill demonstrated.

Scanned with CamScanner

5 – Extremely Skilled - Demonstrates the skill consistently, independently, accurately, and effectively. Performs beyond the expected level with confidence and initiative.
4 – Moderately Skilled - Demonstrates the skill effectively and consistently with minimal guidance. Meets the expected level of performance.
3 – Developing - Demonstrates the basic skill adequately but may require occasional guidance, practice, or improvement.
2 – Needs Improvement -Demonstrates limited skill and requires frequent guidance, supervision, and practice to perform the task appropriately.
1 – Not Skilled at all - Demonstrates minimal or no evidence of the skill and requires substantial guidance and support.

MAINTAINING EFFECTIVE COMMUNICATION	5	4	3	2	1
Active listening			✓		
Receiving constructive feedback			✓		
Establishing a relationship based on trust			✓		
Identifying and accommodating different communication styles			✓		
Employing strategies to improve communication with cooperating teacher			✓		
Helping the cooperating teacher coordinate effectively with other cooperating teachers			✓		
ALIGNING EXPECTATIONS	**5**	**4**	**3**	**2**	**1**
Working with cooperating teacher to set clear expectations of the mentoring relationship			✓		
Aligning expectations with the cooperating teacher			✓		
Considering how personal and professional differences may impact expectations			✓
